A Competitive Edge: Partnerships that benefit business and the environment.

Mitigation Connection has opportunities that can help you provide your clients with a higher level of service.

Working in the environmental field always means looking at the bigger picture- seeing how linking natural areas can benefit multiple stakeholders, connecting conservation and development through planning and design, relating economics and sustainability. We have extended this vision to our business. At Mitigation Connection, LLC we see the advantage of joining forces to benefit clients and consultants. We believe that working with others in our field to provide the most comprehensive service for our clients provides a win-win situation for everyone.

What is Mitigation Connection, LLC

Mitigation Connection, LLC was created to market mitigation opportunities. Our main objective is to provide our customers with valuable information that saves them time and money, making the job of finding and securing mitigation easy. Our team consists of Environmental Scientists, Wildlife Biologists, Engineers, Geographic Information Systems (GIS) Analysts, and Environmental Planners. Mitigation Connection, LLC represents clients with over 4 million acres in 10 states throughout the US.

On our website, you will find opportunities to purchase mitigation bank credits and parcels of land suitable for mitigation projects. We make the site selection process simple with the use of innovative ArcIMS® tools that allow for independent, online analysis of site characteristics using aerial photography, topographic relief (USGS Quadrangles), hydrologic connections, location within drainage basins or service areas, location relative to nearby conservation areas, and proximity to roads and urbanized areas.

Sharing the Benefits of Our Business

We believe that joining forces to share the benefits of our business will be a win-win for everyone.

Becoming an affiliate of Mitigation Connection, LLC will help your company generate new business that may increase profitability, reduce overall costs, and reduce non-billable time.

- **Bringing clients and consultants together.** Clients of Mitigation Connection, LLC will have access to a list of affiliate firms to help them find mitigation consultants, and will be given referrals based on their specific project requirements.
- **Commissions.** Affiliate firms that provide client referrals resulting in the sale of mitigation bank credits or a mitigation project will be entitled to a shared commission.
- **We do the legwork.** Our GIS analysis of our extensive land base to identify potential mitigation projects will decrease the time you spend in property searches. Simply, use our online resources to help you identify high quality projects that match your clients' needs.
- **Making it easy.** Mitigation Connection, LLC provides support to help both the client and the consultant through the procurement process.
- **Referrals.** When our mitigation opportunities cannot accommodate our clients, we strive to refer them to an affiliate firm that has a solution.

Mitigation Connection, LLC recognizes the advantages of working together to reach common goals. We can help you provide your clients with solutions to their mitigation problems, and to generate new clients as we work hard to make our own business grow. Please check out our website to see if we have any mitigation credits or land that will help you. Also, please contact Anna Prizzia, Marketing Director, to discuss possible partnerships and ventures.
